SKILLS

- **Languages:** Java, SQL, Python, C++
- **Web Technologies**: HTML and CSS
- **Tools/Platforms**: MySQL, Git, GitHub
- **Soft Skills**: Problem-Solving, Team Work , Adaptability

PROJECTS

FITNESS PLANNER APPLICATION **| GitHub** January 2024– February 2024

- Developed a fitness planning application using C++, HTML, CSS, and JavaScript to help users create and track personalized workout and diet plans.
- Implemented features such as BMI calculator, daily routine planner, and progress tracking with a user-friendly UI.
- Used C++ as backend logic to handle data processing and core calculations for fitness recommendations.
- Enhanced user experience with responsive web design and interactive elements to improve usability across devices.
- Tech stack: HTML5, CSS3, JavaScript, Google Gemini API

SHOE BRAND WEBSITE – KALA URBAN CANVAS **| GitHub** October 2024 – November 2024

- Designed and developed a dynamic shoe brand website using Tailwind CSS, JavaScript, C++, and HTML showcased product listings and brand identity.
- Integrated product filter, cart preview, and animation effects to improve customer engagement and browsing experience.
- Utilized Tailwind CSS to build a modern, fast-loading, and fully responsive UI with reusable utility classes.
- Formulated backend logic in C++ for inventory simulation and product data handling, ensured smooth functionality.
- Tech stack: HTML5, CSS3, JavaScript, Google Gemini API

SLEEP MONITORING SYSTEM **| GitHub** August 2025 – September 2025

- Built a sleep monitoring system using Python and React to track sleep duration, quality, and daily patterns.
- data visualization using charts and graphs to provide insights into sleep cycles and user habits.
- Applied Python for data processing, analytics, and pattern recognition, while React handled the interactive frontend.
- Added user authentication and secure data storage, improving privacy and long-term habit monitoring.
- Tech stack: HTML5, CSS3, JavaScript, Google Gemini API

TRAINING

Mastering C and C++Programming (board infinity) January 2024– February 2024

- Completed a structured skill-development program focused on mastering C and C++ programming
- Gained strong understanding of structures, OOP concepts, STL, file handling, and system-level programming
- Applied concepts by developing a mini-project – C/C++ Program Visualizer, pointers, memory management, showcasing real-world implementation of core programming techniques.
- Strengthened logical thinking and problem-solving skills through coding exercises and hands-on practice in **C and C++**

CERTIFICATES

- The Bits and Bytes of Computer Networking - coursera**| Link** July 2025
- Lean Management – simplilearn | **Link** February 2024
- Fundamentals of Network Communication – coursera | **Link** January 2024
- Introduction to Hardware and Operating Systems – coursera | **Link** March 2023

ACHIEVEMENT

July 2025– December 2025

- Solved 100+ coding problems across **LeetCode**, **GFG** & **HackerRank**, sharpening problem-solving skills.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  B. Tech (Computer Science and Engineering) ; CGPA: 6.49 August 2023 - Present
- **Sasi junior college.** Tanuku, AP
  Intermediate ; Percentage: 83.3% June 2021 – March 2023
- **Drkkr's Gowtham school** Tanuku, AP
  Matriculation ; Percentage:99.4% June 2020 – March 2021
